Dear Steve

SAVVY CONSTRUCTION

You recently asked if I would be prepared to provide a reference for Savvy Construction. I am of course delighted to do so and write accordingly.

As you know, we in the Building Consultancy and Architectural & Design Team at Savills have been working with Savvy Construction for several years on a variety of projects totalling several millions in value. Significantly, your work with us has involved many sensitive projects that range, for example; from refurbishment and alteration of a Grade I Listed Building to the formation of new build commercial units. Furthermore, we have required your work to be of the highest standard to reflect the exacting requirements of our clients in terms of quality, cost and programme requirements. In response to these challenges, I have to say that Savvy Construction have always provided a first class service for us.

You, your management team and site foremen have all displayed a most professional and client focussed approach to any project we have put before you. Indeed, it is this professional and client focussed ethos that sets Savvy Construction above other contractors. In many respects Savvy Construction have been a refreshing organisation to work with; a sentiment expressed by all those clients of ours with whom you have worked.

Given the great performance of Savvy Construction for Savills, it makes it very easy for me to confidently recommend you to others who may be considering employing your services; they will, I feel sure, be impressed by the service you provide.

Yours sincerely

A handwritten signature in blue ink, appearing to read "M Sheppard", written in a cursive style.
